

March 18, 2015

Dear Cenpatico Provider,

Cenpatico is committed to ensuring that services delivered to Peach State Health Plan members are being billed and reimbursed according to the Medicaid guidelines. Effective Monday, April 20, 2015 providers must bill with both the rendering provider's **Taxonomy Code** and NPI in box 24J. In addition, providers must include an ID qualifier in box 24I for the **Taxonomy Code**, as well as the OPR (**Ordering Prescribing Rendering**) provider's NPI number in box 17.

Cenpatico will return claims when billing information does not match the information that is currently in our files. Claims missing the requirements in bold will be returned, and a notice sent to the provider, creating payment delays. Such claims are not considered "clean" and therefore cannot be entered into the system.

We appreciate and value your partnership with Cenpatico and thank you for being a Network Provider serving the members of Peach State Health Plan. If you have questions about the information described in this letter, please call Customer Services at 1-800-947-0633.

Sincerely,

Toyanda Williams
Network Manager
