

### **Substance Use Disorder Rates/Covered Benefit Revisions**

Effective for dates of services on and after October 1, 2015, the Substance Use Disorder (SUD) rates, units and procedure codes will be established per the attachment to this policy. Provider types and specialties allowed for each service are also notated in the attachment for this policy.

Procedure code H0015 will no longer be billed with modifier HA. The beneficiary date of birth will be used to differentiate between adult and youth. For any procedure code whose billing increment is “one unit = one day”, the Medicaid pricing method should be “allow one unit.”

For reporting purposes, KDADS will need the ability to pull the attached services specific to SUD providers from Fee-For-Service (FFS) and Managed Care Organization (MCO) encounter claims within the Medicaid Management Information Systems (MMIS).

In terms of coverage and allowed provider types/specialties, coverage for Title XXI should match current Title XIX benefit segments (including revisions identified within this policy). Should you need additional assistance, please contact customer service at 866-896-7293.

Best Regards,
